Publisher's Note

Many birds are identified with various human emotions, and celebrated in myth, poem, and song. Two constellations were given the Latin names Aquila and Cygnus (Eagle and Swan). Eagles and owls also figure in the Greek myths. In Chinese mythology, the appearance of a phoenix indicated the imminence of some great event. The ancient Egyptians adopted the phoenix as part of their ritual of sun-worship, which centered on a variety of heron. The heads of the vulture, falcon, goose, and ibis were used to symbolized several of the major Egyptian gods, both male and female. In more recent times, the Mayan people worshipped the "plumed serpent" god Kulkulcan, who appeared in the later Aztec culture as Quetzalcóatl. The quetzal (a variety of trogon) was the sacred bird of the Mayas. The oral traditions of various Native American groups in North America included creation myths focused on birds, and trickster stories featuring Raven or Crow. In both North and South America, the robin and other locally familiar birds are the focus of tales.

In modern English literature, Shelley's "To a Skylark" and Keats's "Ode to a Nightingale" are among the poems whose appeal has crossed centuries and continents. In the United States, poems using bird imagery have varied from the spare syllables of Emily Dickinson's "A bird came down the walk" to Elizabeth Bishop's "Love is feathered like a bird." Not merely "the bluebird of happiness" and the "red red robin," but even the far-less-familiar titmouse has been featured in song and verse. Birdcalls have been imitated in signal codes, birdsongs reproduced in melodies. In many African cultures, songs associated with birds or with lyrics attributed to them are common. An example is one in which a male nightjar laments the fact that "maidens" are not attracted to him because his features are not handsome. Some of the songs, in several languages, include representations of birdcalls. In South Africa, boys and young men compete to devise the best bird riddles in which a species of bird is likened to a person or to a type of person—such as saying that the white-collared raven is like a missionary.

Birds' feathers of diverse kinds have been used in many times and places for adornment, and also as amulets and in spiritual symbols. Eagle feathers were especially important in the rituals of several North American tribes, notably those who dwelt in the Great Plains. In mythology, folktales, popular songs, nursery rhymes, and opera, birds such as the phoenix, the condor, the raven, the crow, the swan, and the goose have embodied specific attributes. The image of a female bird—or a pair—feeding and protecting nestlings is the height of heartwarmingness, while the profile of a wide-wingspanned bird soaring or powerfully beating the air is emblematic of freedom. On a more mundane level, plucked plumage has been used in quilts, pillows, mattresses, and clothing—for keeping warm—and as fans—for getting cool.

Birds, in astonishing variety (about 8,650 species) and enormous total numbers, are found in every climate on the planet. Almost 800 species are found in the United States and Canada. Colombia is the country that is home to the largest number of bird species—more than 1,700. Small Costa Rica has the largest number of species per square mile, fostering about as many as live in the vast expanse of the United States and Canada combined. The reasons for the great proliferation of bird variety in Colombia and in Costa Rica are that both of these countries of South and Central America have fecund tropical rain forests, a variety of habitats, and several altitude zones, each with vegetation, temperature, and animal life suited for differing bird species.

Fossil records show that most of the species living today have been around for hundreds of thousands of years. Some, as different as ostriches and penguins, are flightless. Others run about on the ground more than they fly. Still others soar above the ocean or float on its surface for months at a time, without ever alighting on land. Most people may not notice the constant presence of birds very much, unless they suddenly are faced with their absence: the harrowing situation predicted by Rachel Carson in her 1962 book *Silent Spring.*

The oldest known fossil bird, dubbed Archaeopteryx ("ancient flying creature") seems to have flourished during the Late Jurassic period and may embody the transition between true birds and their flying reptile ancestors, known as pterodactyls or pterosaurs. This crow-size creature had a mixture of reptilian and avian features: a long tail with 20 vertebrae, 3 toes with claws on each foot, some hollow bones, a small brain, and feathers much like those on the wings of modern birds.

For half a century, the field guides and other writings of ornithologist and artist Roger Tory Peterson, along with his paintings of birds from around the world, have fascinated millions of people. Many other checklists, classifications, and introductory ornithology guides are available for people who want to get started as bird-watchers, or to photograph or draw birds. Any person living in North America can expect to see at least 250 species of birds—and many more, with a little effort—in a lifetime. As a preliminary to getting out and watching birds, or simply to decide which species to get acquainted with, or to find an apt illustration for a project with a bird motif or connection, a perusal of the *Big Book of Bird Illustrations* will give a good introduction to the amazing variety of bill types, wing forms, crests and other elaborations of plumage, toes/talons/claws, nest varieties, sizes, and shapes found in the avian world. Some of the books from which these illustrations were taken, and many birders' books, offer descriptions of habitats, breeding, year-round and winter ranges, migration patterns, calls and songs, coloration, camouflage, diet, predators, mating behavior, eggs, parenting, and all the other elements of boundless bird variation.

Contents

Favorite Birds	1
Audubon's Birds of America	9

Cockatoo, Sulfur-Crested 61
Condor 66
Condor, Andean 20
Condor, California 98
Coot, American 39
Coot, Hawaiian 32
Cormorant 68
Cormorant, Double-Crested 39
Cowbird 7
Crane, Crowned 66
Crane, Whooping 13, 41
Creeper, Brown 4
Crossbill, White-Winged 15
Crow, American 90
Crow, Common 7
Crow, Hawaiian 33
Cuckoo 72
Cuckoo, Channel-Billed 82
Cuckoo, Great Spotted 81
Cuckoo, Radiated Ground- 75
Cuckoo, Yellow-Billed 89
Cuckoo Roller or Kirombo 75, 98
Curassow, Crested 66, 81
Curlew, Eurasian 75, 101
Curlew, Long-Billed 36
Dipper 67
Diver, Great Northern 73
Dodo 69
Dove, Mourning 1, 13
Dove, Ring 81
Duck, American Black 50
Duck, Black-Bellied Whistling 48
Duck, Fulvous Whistling- 47
Duck, Harlequin 51
Duck, Hawaiian 34
Duck, Mandarin 55
Duck, Ring-Necked 47
Duck, Ruddy 48
Duck, Shoveler 84
Duck, Wood 15, 45, 63, 100
Dunlin 35
Eagle, Bald 22, 28, 53, 98
Eagle, Bonelli's 101
Eagle, Booted 97
Eagle, Golden 23, 92
Eagle, Guiana 86
Eagle, Harpy 17, 84, 92, 102
Eagle, Imperial 21
Eagle, Long-Crested Hawk 23
Eagle, Serpent 84
Eagle, Vulturine Sea- 97
Eagle, White-Tailed 21
Egret, Great 39
Egret, Snowy 10, 53, 65
Eider, Common 51
Eider, King 44, 45
Eider, Spectacled 37, 48
Eider, Steller's 45
Emu 76
Emuwren, Southern 88
Falcon, Peregrine 22, 38
Falcon, Prairie 19
Finch, Purple 9, 29
Firetail 83
Flamingo, Greater 15, 40, 62, 76
Flicker, Yellow-Shafted, or Yellowhammer 7, 16, 26, 100
Flycatcher, Hawaiian 32
Flycatcher, Paradise 62
Flycatcher, Scissor-Tailed 29, 71
Fork-Tail, Leschenault's 86
Frigatebird 75
Frigatebird, Great 33
Frigatebird, Magnificent 35, 59
Frogmouth, Eared 86
Frogmouth, Tawny 60, 91
Fulmar, Northern 41
Gadwall 50
Gallinule, Hawaiian 31
Gallinule, Purple 13, 37, 77
Gannet, Northern 37, 51, 74, 102
Goatsucker or Nightjar 70

BIG BOOK OF BIRD ILLUSTRATIONS

Selected and Arranged by
MAGGIE KATE

An indispensable resource for anyone in need of bird illustrations, this magnificent compendium comprises more than 600 copyright-free images of birds from around the world, including some that are now extinct.

Here are handsome and accurate renderings of ducks and geese, herons, owls, eagles, woodpeckers, hummingbirds, and many other birds, both familiar and less well known, rendered in a wide variety of styles. An identification appears with each illustration, and complete indexes of both common and scientific names make finding a specific bird easy. Among the birds depicted are:

Passenger Pigeon	Canada Goose	Hawaiian Duck
Green Heron	White-tailed Eagle	Green Magpie
Northern Shelduck	Baltimore Oriole	Atlantic Puffin
Sparrow Hawk	Hoatzin	Downy Woodpecker

. . . and many more.

Ready for immediate, permission-free use, these high-quality illustrations will answer the professional needs of artists, illustrators, and desktop publishers. They'll also appeal to anyone with an appreciation of avian art—students, wildlife enthusiasts, collagists, and other craftworkers.

Original Dover (2000) compilation of more than 600 black-and-white illustrations from 14 Dover Nature Coloring Books and other sources. Identifications. Index. 112pp. 9 x 12. Paperbound.
